

June 9, 2014

We would appreciate it if you would prepare a specification for concrete as an alternative to asphalt for the new school parking lot project. We want an opportunity to compete.

My family has been tied to the Hermantown School District for decades. My father, Hjalmar (Jolly) Carlson served on the school board for many years and endorsed every one of his checks over to the Hermantown High School Band. My brother, sister and I graduated from Hermantown. My company gives a citizenship award every year to two graduating seniors.

For 77 years we have lived and operated Arrowhead Concrete in Hermantown supplying concrete products to residential, commercial, industrial, and governmental projects.

Concrete parking lots are great because they are

- Economical to build and maintain
- Light reflective so you need fewer lights and consequently, the lifetime electrical costs will be significantly less.
- Brighter and therefore safer at night.

Please consider a concrete alternative for your new parking lot. Question? Call Jerry Carlson at Arrowhead Concrete Works: 729-8274.
