Concrete streets for grain elevator in Lamberton

Project description

First Avenue (CSAH 106) and Ilex Street (County Road 6) in Lamberton, Minn. run in front of and beside the Meadowland Grain Elevator and get a lot of heavy truck traffic. The City of Lamberton and Redwood County worked closely together to remove the deteriorating asphalt and replace it with concrete. The sidewalk at the intersections were reconstructed to be ADA compliant.

The city replaced the infrastructure and Bolton & Menk completed the design, construction management services and onsite inspection. The county, which tapped into State Aid funding for the project, paved the road surface with 8" of non-reinforced concrete.

Project date

June 20, 2013 – July 23, 2014.

Additional project details

- The streets were completely reconstructed in three phases.
- 3,166.50 cu. yds. of ready mix was placed.
- Length of front and side paved streets – .5 miles

Team

Owner: Redwood County

Design Engineer: Bolton & Menk

Paving Contractor: Hoffman Concrete, Inc., Mankato.

Ready Mix Supplier: Buffalo Ridge Concrete, Lamberton.
