

ACI Concrete Strength Testing Technician

A Concrete Strength Testing Technician is an individual who has demonstrated the knowledge and ability to properly perform, record, and report the results of four basic laboratory procedures related to the determination of concrete compressive and flexural strength.

This program requires working knowledge of the following ASTM practices and test methods: capping cylindrical concrete specimens, unbounded caps for concrete cylinders, compressive strength of cylindrical concrete specimens, and flexural strength of concrete.

Those meeting the ACI requirements of passing both the written and performance exam will be granted certification.

- Prerequisites: None
- Fees: Dependent on number of students per class
